

New Poly-Classic® Composite Railing System

Turncraft has just released another “**Green Product**”, introducing the New Poly Classic Composite Railing System.

Fiber-Reinforced Recycled ABS

Our Poly-Classic Composite Railing System is made from fiber-reinforced recycled ABS (acrylonitrile-butadiene-styrene) with a vinyl top layer. ABS is very strong, durable, and impervious to weather and when combined with the vinyl top layer will offer a lifetime of function and beauty.

Available Railing System Kits

This railing is offered in 6' and 8' kits which include everything needed for installation between two points. We also offer the railing in lineal form for custom installations.

Available Colors

We have two colors, white and black to fit perfectly in just about any application.

For more information on this or any of our products please visit our website at www.turncraft.com
