

TURNCRAFT®

Colonial Post Defense™ Post

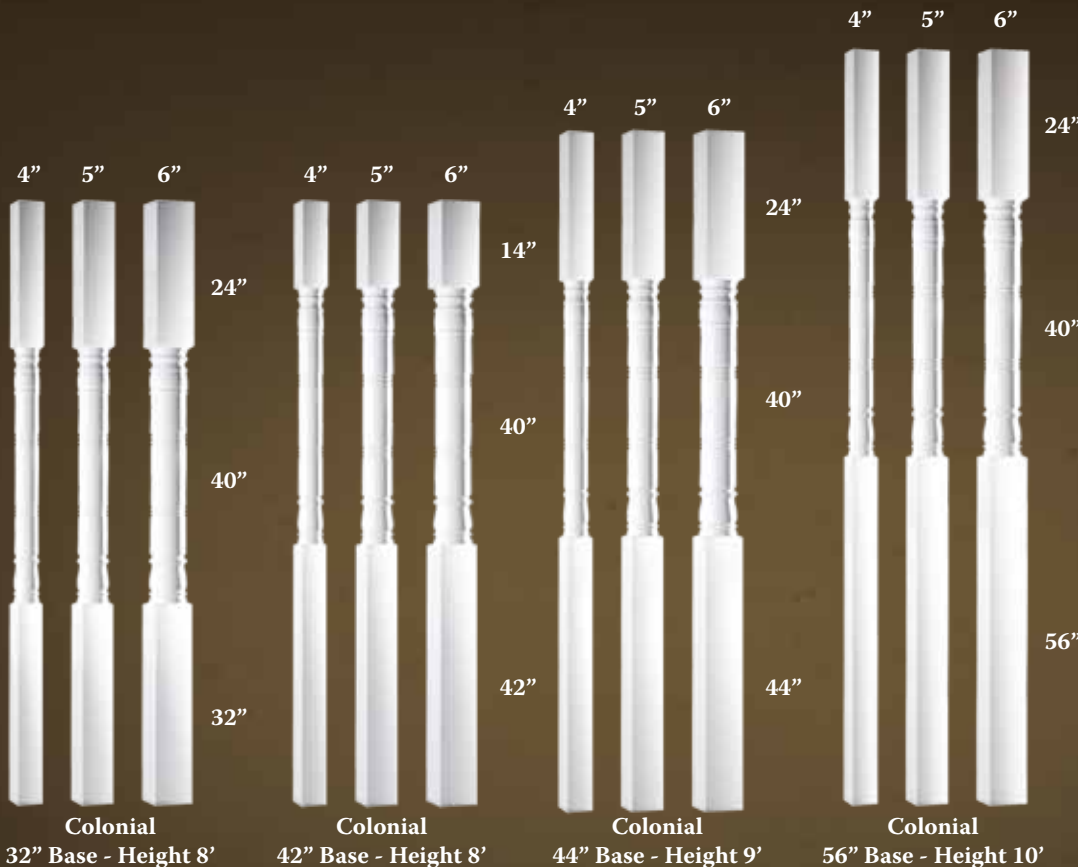

Turncraft's Post Defense Posts

Turncraft's Post Defense Posts are precision turned on a proprietary rotary lathe. The turned area is then machine sanded and the entire post is primed with an acrylic primer that will accept a high quality exterior grade latex or acrylic paint. Lastly we apply a special formulated end seal to the base of the posts to help prevent moisture from entering the bottom of the posts. This all adds up to the best turned post on the market with the best warranty on any wood post.

10-Year Warranty

Turncraft warrants that its Colonial Post Defense Posts, when properly installed, will be free of rot and decay for 10 years from the date of original installation. Periodic maintenance is required.
