**Colonial Tapered Round Shaft Specifications**

**PLAN TYPES**

Colonial columns are available in the following plan types. Please specify when you order. Columns other than Plan Type A are not load bearing. Split or reassembled columns are not load bearing.

- **Plan Type A**
- **Plan Type AS**
- **Plan Type B**
- **Plan Type C**
- **Plan Type D**
- **Plan Type Q**
- **Plan Type W**

**PRECISION CRAFTSMANSHIP**

Turncraft Wood Colonial columns begin with the milling of finger-jointed or solid staves to exacting dimension. The staves are then assembled into a raw shaft using the strongest Type-I waterproof glue. Torque bands are wrapped around the shaft applying 90 to 100 pounds of pressure per square inch, transforming the individual staves into a single unit, ready for precision turning.

**UPON REQUEST:**

- **Priming** is applied in two coats, using a specially formulated primer developed exclusively for Turncraft. The column is sanded before Turncraft. The column is sanded before each coat.
- **Asphalt coating** of the shaft interior is applied to the bottom three feet of the shaft.

* Shaft net diameters are 3/8" less than nominal.
** For wood columns, inside sizes are based on the inside diameter of the polyurethane cap. Other caps (wood and ornamental capitals) have different sizes and these numbers will not apply.

**Turncraft manufactures a full selection of Colonial design columns in finger-joint western pine. Other species may be available upon request.**

Columns from 14" to 24" diameter are available. Call for more information.
